

Lighting / LED Wall Lamps / Battery operated / Draco

Product data sheet

## Draco

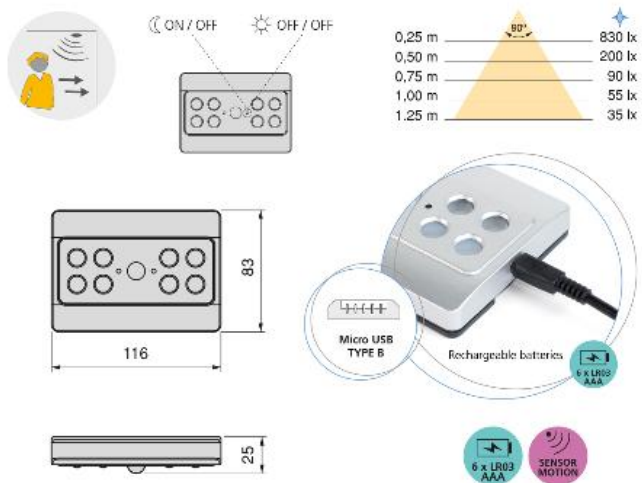

Battery operated

### Specifications

Lumen	Power	Colour temperature	LEDs		Cod.	Finishing
45 lm	0,48 W	Cold white 6.500 K	8	5	<b>5053025</b>	Silver painted

### Diagram

### Information

It includes batteries that can be recharged using a mobile 5V DC 1A mobile charger with a B type micro USB jack.

The batteries included are for the purpose of checking the product.

It has a built-in auto-resettable movement sensor which keeps the light on while it detects movement and it turns off after 30 seconds.

Also, it has a twilight sensor which prevents turning the light on if there is excessive light. In this manner the light is only switched on in conditions where there is a shortage of light, which saves the battery.
